Senior Java Full-Stack Engineer | Spring Boot | Angular | Microservices

ABOUT ME

Senior Java Full-Stack Engineer with 6+ years of experience delivering high-risk, revenue-critical applications in the financial domain. Strong expertise in Java, Spring Boot, Angular, microservices, CI/CD, and test automation. Proven track record in large-scale system modernization, release management, and improving code quality, stability, and delivery speed in enterprise environments.

EDUCATION

MASTERS OF COMPUTER APPLICATIONS
SRM institute of science and technology
07/2017 - 09/2019

BACHELOR OF COMPUTER APPLICATIONS
Vels University
07/2014 - 05/2017

SKILL

- **Backend**: Java 11, Spring Boot, Spring Security, REST APIs, Hibernate, JPA, HQL
- **Frontend**: Angular 14, TypeScript, RxJS, HTML5, SCSS
- **Architecture**: Microservices, Agile/ Scrum, CI/CD Pipelines
- **DevOps & CI/CD:** Git, Jenkins, Docker, Kubernetes, JFrog Artifactory, SonarQube, Fortify
- **Testing**: JUnit 5, Mockito, Cucumber, Selenium, Postman
- **Cloud & Tools:** AWS (EC2, S3), GitHub Actions, Swagger, Jira

LANGUAGES KNOWN

- **English** – Native
- **Hindi** – Native
- **Tamil** – Native
- **Telugu** – Native

WORK EXPERIENCE

- **Senior SOFTWARE ENGINEER** BNP Paribas **06/2019-Present**
  - Led modernization and continuous enhancement of 4 high-risk, high-revenue financial applications, including Java 4 → Java 8/11, SVN → Git, and Ext JS → Angular migrations
  - Designed and implemented BDD-based automated testing using Cucumber and Selenium across 3 applications, reducing pre-release NRT effort by ~70%.
  - Integrated code quality and security tooling (SonarQube, Fortify) into CI pipelines, significantly improving maintainability and reducing production defects.
  - Built and stabilized CI/CD pipelines using Jenkins, Docker, Kubernetes, and JFrog, improving deployment reliability across environments.
  - Acted as Release Manager for 6 mission-critical applications, coordinating with global stakeholders and ensuring zero production incidents for 10,000+ users over 5 years.
  - Played a key role in end-to-end migration of a legacy web application to a mobile-compatible Angular + Spring Boot architecture, contributing across frontend and backend layers.
  - Collaborated closely with onshore product owners, developers, and business teams within an Agile delivery model.
  - Mentored junior developers and reviewed code to enforce quality and best practices

PROJECTS

- **Hybrid Fund Transaction & Fee Calculation Platform**: Developed backend services handling liquidity, commitment, retrocession, and miscellaneous fee workflows for financial instruments.
- **Drawdown & Portfolio Management Systems:** Built tools for portfolio analysis, financing via drawdowns, trade execution, due diligence workflows, and simulation utilities.

INTERESTS

- **VFX**
- **CGI**
- **Opensource communities (AI research)**
- **Digital and Traditional art**

ACHIEVEMENTS

- **Rising Star Award** – BNP Paribas (2020)
- **Multiple Team Awards** – 2023, 2024

PERSONAL PROJECTS

Online Art portfolio management — Full-stack (01/2019)

- Javascript, HTML5, CSS, MySQL server, XAMPP, PHP

Personal portfolio website (01/2025)

- Personal portfolio website showcasing projects and skills, built with Angular and Spring Framework, focusing on modular architecture and responsive UI.
